

## Memo

**To:** Residents and Family  
**From:** Tina O'Malley RN, ICC  
**Date:** January 29, 2025  
**Re:** Enteric Outbreak Update

---

Unfortunately, an additional resident case developed on the weekend which has extended the outbreak. Residents continue to have meals in the dining room and enjoy small group activities on their individual units. The home remains closed to general visitors with essential caregivers only able to visit. PPE is only required to be worn in rooms of isolating residents; however, masks are available at the entrance for those who choose to wear. Another memo will be sent once the outbreak is over and all visiting restrictions are lifted.

Cases:

- Zone 2 (rooms 101-120): Active resident cases: 0    Resolved: 21
- Zone 3 (17-32): Active resident cases: 0    Resolved: 10
- Zone 4 (1-16): Active resident cases: 0    Resolved: 18
- Staff cases: Active: 0    Resolved: 44

Thank you,

Tina O'Malley RN, ICC
