

## Memo

**To:** Residents and Family  
**From:** Tina O'Malley RN, ICC  
**Date:** February 21, 2025  
**Re:** Respiratory Outbreak Update

---

Valley Manor would like to provide a quick update on the Influenza A outbreak before the weekend.

Thankfully, this Influenza outbreak has not been as contagious as the last outbreaks we have experienced. Cases remain low and sporadic in both residents and staff. The last resident developed on February 19, 2025. Once there has been a period of 8 days with no new cases, Public Health will review our outbreak and hopefully declare it over. This means that the outbreak will continue at least into late next week.

Visitor restrictions continue but well residents may still leave the home for outings if families wish to take them.

The Activity department continues to provide one on one visits and in-room activities on the affected zones and small group activities on the unaffected zone.

Cases:

- Zone 2 (rooms 101-120): 0
- Zone 3 (17-32): 1 active case, 4 resolved
- Zone 4 (1-16): 1 active case, 4 resolved
- Staff cases: 15

Thank you,

Tina O'Malley RN, ICC
